Aarav (fictional sample)	**12 November 2026**	**MLC-AARA1112**

YOUR PROFILE AT A GLANCE

INTEREST PATTERN
Investigative + Artistic · Holland code IAS

COGNITIVE PATTERN
Strongest in Verbal reasoning

BEHAVIORAL PATTERN
exploratory response pattern (Openness)

MOTIVATORS
Creative Freedom and Intellectual Challenge lead your priorities

EXECUTIVE SUMMARY

Aarav's assessment shows a clear pull toward Investigative and Artistic interests, the two patterns that most consistently stood out across the interest inventory. On the cognitive side, verbal reasoning came through as a relative strength. Behaviorally, the responses lean exploratory, and creative freedom stands out as the leading priority in what Aarav would want from a future role. Read together, these four patterns — not any single score — are what the rest of this report uses to explore career areas worth considering.

SAMPLE REPORT

How to Read Your Results

This assessment looks at four separate dimensions. Each is scored on its own, and each tells a different part of the story — none of them on its own is a complete picture.

Vocational Interest

What kinds of activities and environments naturally attract you — not what you're good at, but what tends to hold your attention.

Cognitive Aptitude

The pattern across numerical, verbal and spatial reasoning tasks on this assessment — a snapshot, not a fixed ceiling.

Behavioral Profile

General response tendencies relevant to study and work — how you tend to approach structure, people and pressure.

What Drives Me

What motivates you — the things that make a subject, an activity or a future path feel worthwhile.

Career matching later in this report should be understood as a combination of patterns across these four dimensions, not a single score. The diagram below is how this report builds toward the career areas on page 9.

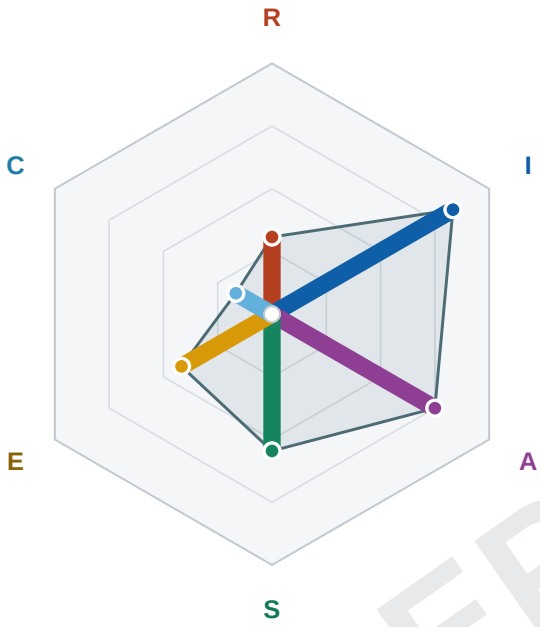

SAMPLE REPORT

METHODOLOGY & LIMITATIONS

Results reflect responses given at one point in time, and interests, reasoning and behavior all continue to develop through the school years. This is a self-report and performance-based assessment for exploration and conversation — not a clinical, medical or diagnostic instrument, and not a guarantee of future performance in any field.

Vocational Interest Profile

Realistic, Investigative, Artistic, Social, Enterprising and Conventional — your own scores, ranked strongest first.

- **Investigative** — 10/12
- Artistic — 9/12
- Social — 6/11
- Enterprising — 5/12
- Realistic — 4/13
- Conventional — 2/12

10/12 · 83%

SECONDARY
Artistic
9/12 · 75%

THIRD
Social
6/11 · 55%

HOLLAND CODE: I A S

SAMPLE REPORT

Understanding Your Interest Profile

Aarav's strongest interests are Investigative and Artistic — here's what that combination tends to suggest.

WHAT THIS SUGGESTS

Aarav tends to enjoy analysing information, asking why something works, and reasoning through open-ended problems; also original expression — writing, design, music or performance — and work without one fixed template.

TYPES OF PROBLEMS YOU MAY ENJOY

problems that reward careful reasoning — data, patterns, causes and effects.

ENVIRONMENTS THAT MAY APPEAL

research or analysis-driven settings that reward independent, in-depth thinking, along with creative, flexible settings that leave room for a personal style or interpretation.

ENVIRONMENTS THAT MAY FEEL LESS ENGAGING

loosely structured settings with ambiguous goals and no clear process to follow.

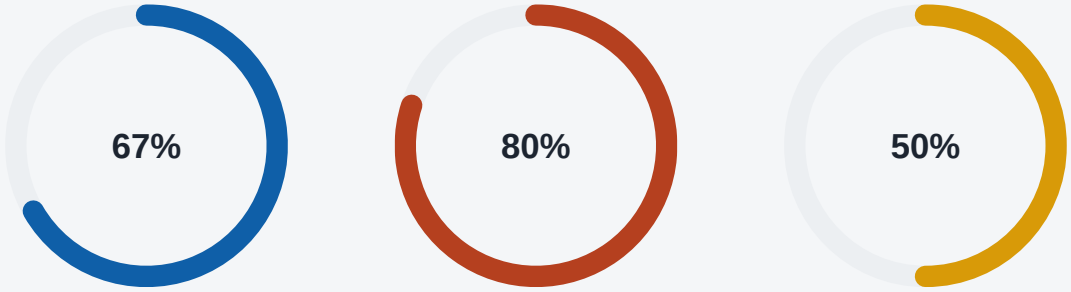

WHAT THIS MAY LOOK LIKE IN PRACTICE

- Digging into how or why something works instead of stopping at the surface explanation
- Being drawn to subjects like science, mathematics, or logic-based problems
- Preferring to research a topic in depth before forming an opinion on it
- Choosing to present a project in an original format rather than the standard one
- Being drawn to subjects like art, music, literature or design

SAMPLE REPORT

Cognitive Aptitude

Fifteen right/wrong questions across three reasoning domains, scored for accuracy.

THE PATTERN

Aarav's verbal reasoning (80%) came through relatively stronger than spatial reasoning (50%) on this assessment.

RELATIVE STRENGTHS

- Verbal reasoning (80%) is the relative high point of this assessment.
- Numerical reasoning (67%) is the relative high point of this assessment.

AREAS TO DEVELOP

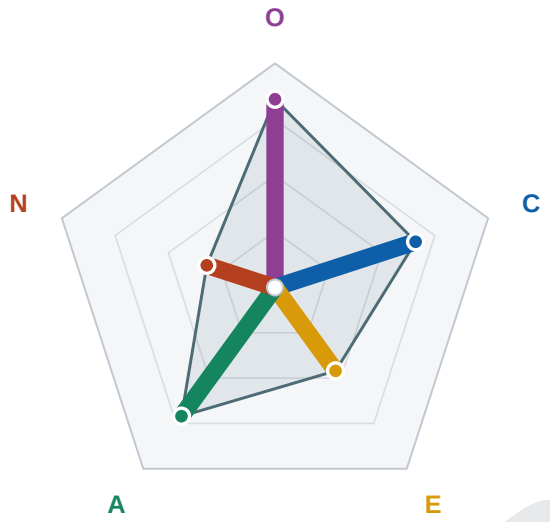

- Spatial reasoning (50%) is the relative low point here — worth building through regular practice rather than treating as a fixed limit.

This assessment measures reasoning patterns on the day it was taken — it is not an IQ test, and none of these domains are fixed. Regular practice changes these numbers over time.

SAMPLE REPORT

Behavioral / Personality Profile

Thirty scenario-based questions across the five OCEAN traits — Openness, Conscientiousness, Extraversion, Agreeableness, Neuroticism.

- **Openness** — 84%
- Conscientiousness — 66%
- Agreeableness — 71%
- Extraversion — 46%
- Neuroticism — 32%

WHAT YOUR PROFILE MAY SUGGEST

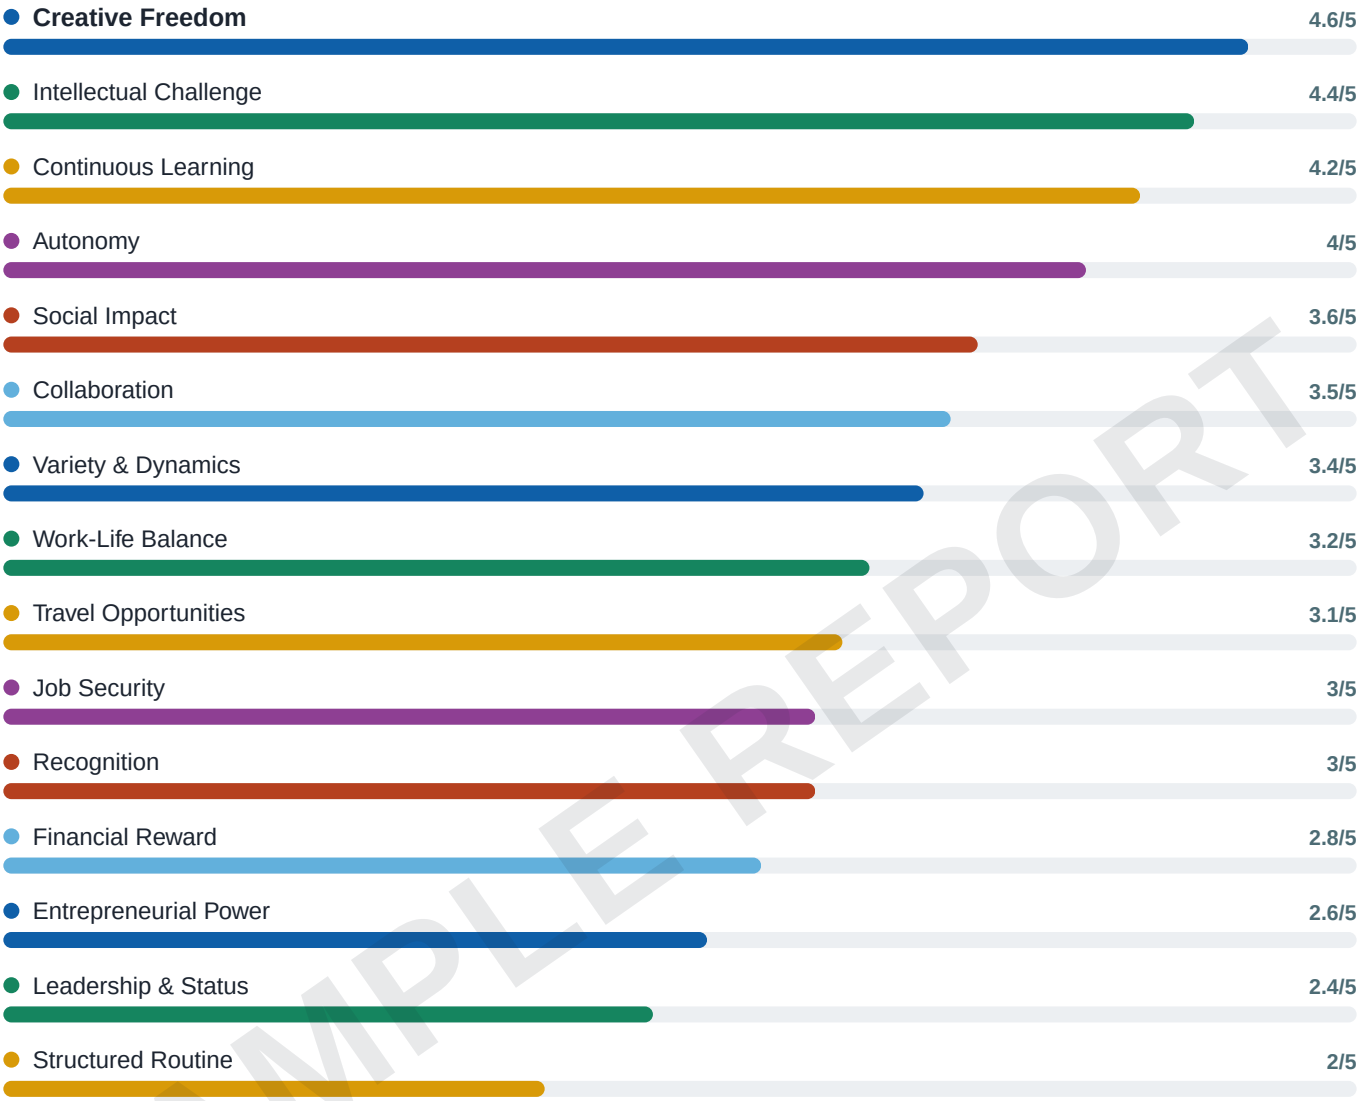

Your responses indicate an openness to new ideas and unfamiliar approaches. Within this assessment, this shows up as comfort with flexible, less-structured tasks and a willingness to explore more than one approach before settling on one — useful in independent project work as well as open-ended team discussion.

Your responses suggest a preference for planning, order and follow-through. Within this assessment, this shows up as comfort in structured environments with clear expectations, reliability in team settings, and a methodical approach to problem-solving.

SAMPLE REPORT

What Motivates You

Fifteen motivators, each self-rated from 1 (Unimportant) to 5 (Essential) — ranked strongest first.

YOUR TOP MOTIVATORS

1. **Creative Freedom (4.6/5)**
2. **Intellectual Challenge (4.4/5)**
3. **Continuous Learning (4.2/5)**
4. **Autonomy (4/5)**

WHAT MAY MATTER TO YOU IN A CAREER

Roles and environments that offer creative freedom and intellectual challenge are likely to feel the most sustaining over time. Settings that consistently work against these — for example, ones offering little creative freedom — may feel less satisfying even when the work itself is otherwise a good fit.

SAMPLE REPORT

Integrated Career Profile

Bringing the four pillars together into one profile.

INTEREST PATTERN	Investigative + Artistic · Holland code IAS
COGNITIVE PATTERN	Strongest in Verbal reasoning
BEHAVIORAL PATTERN	exploratory response pattern (Openness)
MOTIVATORS	Creative Freedom and Intellectual Challenge lead your priorities

WHAT THIS COMBINATION SUGGESTS

Aarav's profile combines a pull toward Investigative and Artistic interests with a relative strength in verbal reasoning, alongside a exploratory working style and a preference for creative freedom and intellectual challenge in a future role. Together, this points toward career areas worth exploring at the intersection of these patterns — investigative-oriented work that also draws on verbal reasoning and rewards creative freedom.

PROFILE STRENGTHS

- A clearly defined interest pattern (Investigative + Artistic), which gives career exploration a genuine starting direction rather than a blank slate.
- Verbal reasoning (80%) is a genuine, assessment-backed strength worth building on.
- A exploratory response pattern (Openness), which tends to support exploring unfamiliar problems and adapting to new approaches.
- A structured and dependable response pattern (Conscientiousness), which tends to support following through on plans and delivering reliably.
- A clear, strongly-held priority around creative freedom — useful for filtering opportunities that will and won't feel worthwhile.

AREAS TO DEVELOP

- Spatial reasoning (50%) trailed the other two domains — a good candidate for regular, low-stakes practice.
- General practice across reasoning types will keep all three domains — numerical, verbal and spatial — moving together.

SAMPLE REPORT

Career Matching

Career order below reflects interest-profile alignment — the dimension this assessment's matching engine actually scores. Independently, Aarav's assessment also shows a relative strength in verbal reasoning, a exploratory behavioral pattern, and a leading preference for creative freedom — real signals worth weighing alongside each match below, even though they are not part of the numeric ranking itself.

01 Graphic Designer

STRONG ALIGNMENT

78% interest-profile alignment

WHY IT APPEARS

This career's own interest profile is led by Artistic and Enterprising — closely matching your own strongest interests, Investigative and Artistic.

WHAT TO EXPLORE

Try a creative project or portfolio piece connected to this field.

02 Architect

STRONG ALIGNMENT

76% interest-profile alignment

WHY IT APPEARS

This career's own interest profile is led by Artistic and Investigative — closely matching your own strongest interests, Investigative and Artistic.

WHAT TO EXPLORE

Try a creative project or portfolio piece connected to this field.

03 Content Creator / Filmmaker

STRONG ALIGNMENT

76% interest-profile alignment

WHY IT APPEARS

This career's own interest profile is led by Artistic and Enterprising — closely matching your own strongest interests, Investigative and Artistic.

WHAT TO EXPLORE

Try a creative project or portfolio piece connected to this field.

04 Psychologist / Counselor

STRONG ALIGNMENT

76% interest-profile alignment

WHY IT APPEARS

This career's own interest profile is led by Social and Investigative — closely matching your own strongest interests, Investigative and Artistic.

WHAT TO EXPLORE

Look for a volunteering, mentoring, or shadowing opportunity in this space.

05 Doctor (Physician)

MODERATE ALIGNMENT

65% interest-profile alignment

WHY IT APPEARS

This career's own interest profile is led by Investigative and Social — closely matching your own strongest interests, Investigative and Artistic.

WHAT TO EXPLORE

Explore through research, reading, or a small independent investigative project.

SAMPLE REPORT

Career Comparison

Career areas worth exploring, compared side by side — not a guaranteed prediction.

CAREER	INTEREST ALIGNMENT	WHY IT APPEARS	WORTH EXPLORING IF...
Graphic Designer	Strong	This career's own interest profile is led by Artistic and Enterprising — closely matching your own strongest interests, Investigative and Artistic.	Try a creative project or portfolio piece connected to this field.
Architect	Strong	This career's own interest profile is led by Artistic and Investigative — closely matching your own strongest interests, Investigative and Artistic.	Try a creative project or portfolio piece connected to this field.
Content Creator / Filmmaker	Strong	This career's own interest profile is led by Artistic and Enterprising — closely matching your own strongest interests, Investigative and Artistic.	Try a creative project or portfolio piece connected to this field.
Psychologist / Counselor	Strong	This career's own interest profile is led by Social and Investigative — closely matching your own strongest interests, Investigative and Artistic.	Look for a volunteering, mentoring, or shadowing opportunity in this space.
Doctor (Physician)	Moderate	This career's own interest profile is led by Investigative and Social — closely matching your own strongest interests, Investigative and Artistic.	Explore through research, reading, or a small independent investigative project.

SAMPLE REPORT

Areas to Develop

Based on Aarav own results — not a generic list, and not weaknesses, just places with genuine room to grow.

1

REASONING

Spatial reasoning

Spatial reasoning came in relatively lower than verbal reasoning on this assessment (50% vs. 80%). This is a pattern, not a fixed ceiling — short, regular practice with spatial problems (puzzles, structured exercises, or subject practice that leans on this domain) is a reasonable way to build it up over time.

2

PROBLEM SOLVING

Broad problem-solving practice

No single area stood out as needing focused attention on this assessment — a genuinely balanced result. General, varied problem-solving practice (puzzles, case-style questions, real-world projects) is a reasonable way to keep developing all three reasoning domains together rather than specialising early.

SAMPLE REPORT

Conclusion & Next Step

YOUR PROFILE IN ONE VIEW

Aarav's profile combines a pull toward Investigative and Artistic interests with a relative strength in verbal reasoning, alongside a exploratory working style and a preference for creative freedom and intellectual challenge in a future role. Together, this points toward career areas worth exploring at the intersection of these patterns — investigative-oriented work that also draws on verbal reasoning and rewards creative freedom.

KEY TAKEAWAYS

1. Your interest code is IAS, led by Investigative and Artistic — a real, assessment-backed starting point for exploration.
2. A clearly defined interest pattern (Investigative + Artistic), which gives career exploration a genuine starting direction rather than a blank slate.
3. Verbal reasoning (80%) is a genuine, assessment-backed strength worth building on.
4. Graphic Designer is the career area with the closest interest-profile alignment to your results — a reasonable place to start researching.
5. This profile is a snapshot, not a verdict — interests, reasoning and values all keep developing through the school years.

WHAT TO DO NEXT

- Discuss this report with a parent, teacher or mentor — a second perspective often surfaces options worth considering that a single read-through misses.
- Pick one or two of the career areas from the Career Matching section and spend some time researching what day-to-day work in that field actually looks like.
- Try one of the practical examples from the Understanding Your Interest Profile section to see whether the pattern holds up outside the assessment.
- Revisit this assessment in a year or two — interests, reasoning and values all continue to develop through the school years.

Your Career Roadmap Follows

Part II of this report translates these findings into a practical roadmap for each of your closest career matches.

SAMPLE REPORT

PART II — CAREER ROADMAP

From Assessment to Action

Aarav's Deep-Dive assessment identifies career areas that align with the current profile. The next step is understanding how to actually explore and pursue these career paths.

What This Section Does

The pages that follow translate the assessment findings from Part I into practical educational and career-planning steps — for the specific careers that came out closest to Aarav's profile. This section does not repeat the assessment; it builds on it.

WHAT'S AHEAD

1. A career overview and the assessment-backed reason each career appears here
2. A visual education pathway, from where Aarav is now to an entry-level role
3. Relevant school subjects, skills to build, entrance exams and education routes
4. A stage-by-stage roadmap and specific things to start doing this month

SAMPLE REPO

PART II — CAREER ROADMAP

Comparing Your Roadmap Careers

A side-by-side view of the career areas roadmapped in this report, before the detail on the pages that follow.

CAREER	WHY IT MATCHES	EDUCATION ROUTE	SKILL FOCUS	KEY SUBJECTS	EXPLORE BY
Graphic Designer	Strong	B.Des in Communication/Visual Design	Visual composition, Design software	Art / Fine Art, English	Start a sketchbook or digital art habit
Architect	Strong	B.Arch	Spatial reasoning, CAD/BIM software	Mathematics, Physics	Practice freehand sketching and basic technical drawing
Content Creator / Filmmaker	Strong	Film/Mass Communication degree	Storytelling, Video editing	English, Media Studies (if offered)	Start a small, consistent content series — video, blog, or photography

Ranking reflects interest-profile alignment only, the dimension this assessment's matching engine computes — not a prediction of which career is objectively "best".
